HYBRID TEA ROSE PLANT NAMED 'FRIVOLOUS PINK'

CLASSIFICATION

The present invention relates to a new Rosaceae Rosa hybrida plant.

5

VARIETY DENOMINATION

The new plant has the varietal denomination 'FRIVOLOUS PINK'.

BACKGROUND OF THE INVENTION

10 The present invention relates to a new and distinct variety of rose plant of the hybrid tea rose of the genus *Rosaceae* which was created by crossing as seed and pollen parents two (2) unknown rose varieties. The varietal denomination of the new variety is 'FRIVOLOUS PINK'.

15

SUMMARY OF THE INVENTION

Among the novel characteristics possessed by this new variety onto the rootstock of 'Dr. Huey' which distinguishes it from other varieties of which I am aware, is its pink flowers.

20 Asexual reproduction by propagation by budding of the new variety as performed in Wasco, California shows that the foregoing and other distinguishing characteristics come true to form and are established and transmitted through succeeding propagations.

BRIEF DESCRIPTION OF ILLUSTRATION

1 The accompanying illustration shows typical specimens of the flowers and foliage of the new variety depicted in color as nearly true as it is reasonably possible to make the same in a color illustration of this character.

5 **DESCRIPTION OF THE NEW VARIETY**

10 The following is a detailed description of 2-year budded plants of the new variety , with color terminology in accordance with *The Royal Horticultural Society Colour Chart* (RHSCC). The terminology used in color description herein refers to plate numbers in the aforementioned color chart. Phenotypic expression may vary with light availability, environmental and cultural conditions.

15 The following observations are made of specimens grown outdoors in Wasco, California, during the month of November budded on 'DR. HUEY' understock.

PLANT

	Form:	Compact
20	Growth:	Medium
	Size:	Height about 3 1/2 feet; width about 2 feet
Foliage		
25	Size:	Terminal leaflet length about 2 9/16 inches; width about 1 3/8 inches
30	Quantity:	<u>Usually 5 leaflet leaves,</u> <u>sometimes 7 leaflets Leaves</u> <u>compound, with 5 to 7</u> <u>leaflets; most typically 7</u>

leaflets

1 Color
 New foliage: Upper side near 175A; under
 side near 175C

5 Mature foliage: Upper side near 137A; under
 side near 137C

 Shape: Elliptic

 Texture
10 Upper side: Smooth, semi-glossy
 Under side: Matte
 Edge: Serrated

15 Serration: Slight
 Petioles: Top surface color near 143B;
 Under side near 144B

20 Stipules: Normal
 Rachis: Few prickles

WOOD
 New shoots
25 Bark: Smooth
 Wood: Near 143C

 Old wood
30 Bark: Smooth

	Wood:	Near 141C
1	Flowering stem:	Length about 16 inches
	Winter Hardiness:	Completely winter hardy
	Resistance to Disease:	Average
5	Preferred growing conditions:	Full sun
	Growth habit:	Medium vigor
10	Leaves per stem:	About 5
	Prickles/Thorns:	<u>The cultivar has the usual number of thorns and prickles; Thorns about 3/16 inch long, near 143C</u>
15	FLOWER/INFLORESCENCE	
	Blooming Habit:	Recurrent
	Bud	Length about 2 inches; width about 1 1/4 inches
20	Form:	Classic rose
	Color:	Before sepals divide color near 56A; when sepals first divide color near 55B; when petals begin to unfurl color near 55C
25	Sepals:	Long, thin on ends, usually 5 sepals per bloom, multiple serrated extensions
30		
35

(Marked-up Copy)**

47498/CAB/C614

	Size:	Length in relation to bud, about 1 3/16 inches
1	Color:	Topside near 145A; bottom near 145B
5	Peduncle	
	Length:	About 2 3/4 inches, smooth
	Strength:	Erect
10	Color:	Near 147B
	Flower	
	Size:	About 4 inches
15	Borne:	Multiple blooms in sprays, usually about 5 to 6 blooms per spray
	Form:	High centered, opens very flat with age
20	Petalage:	About 20, petals are fan-shaped
	Petaloids in center:	About 3
25	Fragrance:	Slight
	Lasting Quality:	About 2 weeks on plant; about 5 days after cutting
	Color	
30	During first 2 days:	Inner petals at flower center topside near 36A; bottom near 36C; outer petals topside

1		near 36B, bottom near 4B, tips of petals are darker pink, near 39A, balance of petals are lighter near 36B
5	Base of petals (Point of attachment):	Near 4B
	General tonality from a distance:	Near 36A
10	Color Change:	As bloom ages, fades to near 158C; after 3 or more days, fades to near 158C
	Petals	
15	Texture:	Soft
	Shape:	<u>Wider than long</u> <u>Oblong shape,</u> <u>length about 1½ inches; width</u> <u>about 1¼ inches</u>
20	Arrangement:	Imbricated
	Appearance:	Velvety
	REPRODUCTIVE ORGANS	
25	Arrangement of stamens, Filaments and Anthers:	Regularly arranged around styles
	Color:	Filaments near 4B; Anthers near 4D
30	Pollen:	No pollen
	Styles:	Medium length

Hips/Seed Vessels/Ovaries

1 Shape: Round
 Size: About 1/2 inch
 Color: Near 147B
5 Seeds: No seeds
 DISEASE RESISTANCE: The cultivar exhibits an
 average resistance/
 susceptibility to disease
